SUMMARY

Highly motivated freelance digital designer looking to pivot into a collaborative position to leverage creative skills and diverse project experience to contribute to innovative design solutions and enhance user experience. Eager to transfer my propensity for learning as displayed by my diverse academic history to quickly become competent and work with a professional team.

EXPERIENCE

Freelance Artist

09/2023 – Present

- Worked on a diverse number of commissioned projects, ranging from interior design to music videos
- Participated in a collaborative product design project with BANWOOD, refining designs based on feedback and A/B testing
- Was commissioned to render 3D models for an interior design project with an independent contractor, involving constant refinement based on client feedback whilst meeting required deadlines for the actual start of the remodelling work
- Designed and produced a dynamic animated music video for an independent band, showcasing creative storytelling, motion graphics expertise, and collaboration to capture the band's vision and enhance audience engagement

EDUCATION

3D Modelling and Texturing

CGBoost Academy

Awarded 2024

- lorem ipsum

BSc Biochemistry (Hons.)

University of Birmingham

Graduated 2019

- Completed degree in a foreign country, demonstrating adaptability, cultural awareness, and the ability to succeed in an English-speaking academic and collaborative environment
- Developed strong analytical and problem-solving skills, enabling precision and attention to detail in creative projects
- Gained experience in presenting complex concepts visually through clear and engaging diagrams and infographics
- Mastered project management and teamwork during laboratory research, ensuring efficient collaboration and deadline adherence

BSc Psychology (Hons.)

Universidad Complutense de Madrid

Graduated 2016

- Acquired a deep understanding of human behavior, perception, and cognition, applying insights to user-centered design and audience engagement
- Build strong research and data analysis skills, supporting data-driven design decisions and effective communication strategies
- Studied visual and emotional influence, leveraging psychological principles to craft compelling visual narratives and brand experiences
