## SUMMARY

Backend Engineer currently working at Spotify within data infrastructure. Prior experience consists of building open banking integrations in the field of fintech, and automation of legal processes in the conveyancing domain. Committed to continuous learning, as demonstrated by pursuing postgraduate modules in Computer Science and AI alongside full-time employment, applying insights from its undertaking to real-world challenges.

## EXPERIENCE

### Backend Engineer I

**Spotify**  an audio streaming and media service provider.

 06/2025 – Present

- Lorem ipsum dolor sit amec, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
- Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.
- Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur.
- Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.

### Backend Engineer

**Bloom**  a fintech company that provides a digitised ROSCA as a service.

 09/2023 – 06/2025

- Spearheaded the design, development, and deployment of an open banking data integration project, ensuring high system reliability and full regulatory compliance.
- Implemented robust encryption mechanisms for storing customers' open banking data, including a dedicated service to manage key rotations for enhanced security.
- Built a customer address lookup service to migrate away from a third-party provider, improving performance.

### Junior Developer

**Juno**  a law firm that uses an in-house proprietary case management system to automate aspects of conveyancing.

 10/2021 – 12/2022

- Developed and implemented automation solutions to repetitive legal processes in the domain of conveyancing, increasing operational efficiency and mitigating human errors, reducing conveyancing time by eight weeks compared to national average. 
- Built internal tool to parse and analyse legal documents, specifically requisition letters from HM Land Registry, designed and implemented the database schema and data hydration process to store extracted data.
- Successfully integrated bespoke workflows for two new company clients and a mortgage lender, helping establish key partnerships and expanding the platform's capabilities.

## EDUCATION

### PGCert Computer Science and Artificial Intelligence

**University of York**

Awarded 2023

- Achieved a mark of 91% in algorithms and data structures exam, demonstrating a strong understanding of core concepts.
- Demonstrated proficiency in Java through comprehensive coursework.

### BSc Biochemistry (Hons.)

**University of Birmingham**

Graduated 2019

- Developed expertise in data interpretation using R, enabling effective statistical analysis and data visualisation.
- Conducted multiple laboratory projects in which novel data was collected and interpreted with R.
